

Grading:

- **Three on-campus exams.....30%** (10% each)
- **Final on-campus exam.....20%**
- **Six online chapter tests.....30%** (5% each)
- **Online Homework assignment.....20%**

Grade: A (90-100%), B (80-89%), C (70-79%), D (60-69%), F (0-59%)

How to compute a Grade?

- Suppose you have 70, 80, and 90 on two midterm exam. Then $(70+80+90)/300 * 30=24\%$
- Suppose you have 80 on the final. Then $(80/100)*20=16\%$
- Suppose you have average of 75% on six online chapter tests. Then $0.75*30=22.5\%$
- Suppose you have 80% on the online homework assignment. Then $0.8*20=16$
- Your total is $24+16+22.5+16=78.5\%$, which is C.
